

Apple Blossom Waldorf School & Family Center

Daily Home Health Screening Tool:

Has your child had a fever of 100.0⁰ (38.0⁰C) or above in the past 24 hours?

Has your child received a dose of acetaminophen or ibuprofen in the last 24 hours?

In the past 24 hours has your child experienced?

- Nausea/vomiting
- Diarrhea
- New rash or existing rash that has spread throughout the body
- Developed a new onset dry cough
- Shortness of breath, rapid breathing or difficulty breathing
- Extreme fatigue or fussiness without recent physical activity
- Bloodshot eyes
- Feeling extra tired – increasingly harder to wake, longer naps or difficulty staying awake
- Neck pain

If the answer to any of the above questions is yes, the child should stay at home.

Illness

A child who is not feeling well cannot participate in school life in a meaningful way. Such a child needs the warmth and comfort of home. If your child is coughing excessively, has heavy nasal discharge, is sick to the stomach, has a fever of 100.0 F or above, or has the flu, please keep your child at home and in bed. If a teacher

determines a child is not well enough to participate, the parent will be asked to take their child home. Do not send your child to school if he/she has an infectious disease or a fever. A child should be fever free without fever reducing medication for 24 hours before returning to school. Please notify the office at (203) 834-0344 by 8:00 am or email the teacher the night before if your child will be absent. Please notify the office if your child or anyone in your family has contracted:

Conjunctivitis

Covid 19	Scarlet Fever	Chicken Pox	Strep Throat
Diphtheria	Measles	Impetigo	Hepatitis
Poliomyelitis	Whooping Cough	Mumps	German measles
Ringworm	Head Lice		

As a courtesy to our parent community, a notification will be sent out to all parents.
